

Strawberry Hill Campus

A new vision for patient care

At Strawberry Hill exceptional patient care is our priority. We have considered our patients throughout every aspect of planning from staff recruitment to patient room features. No detail was overlooked throughout the planning and development of this facility to ensure the most therapeutic experience with evidence-based, patient-oriented, multidisciplinary care.

Patient benefits include:

- Individualized treatment planning and patient care
- Spacious private rooms complete with their own full bathroom and a music system with various programming options from which to choose
- Expanded dining options with healthy choices for each meal
- Technology time each day where patients will be able to utilize their own devices or those provided by the facility
- High ceilings with lots of natural light provided by the gorgeous atrium shown below
- An indoor recreation area that can be used for exercise, yoga or movie nights
- State-of-the-art exercise equipment
- A specially designed outdoor recreational space
- Seven day access to a full range of therapeutic services and activities
- Beautiful views of downtown Kansas City and the Missouri River
- On-site access to internists to care for medical needs
- A range of medical consultants available from The University of Kansas Health System, voted best hospital in Kansas
- Portable radiology equipment and on-site lab draws to reduce the need for patient transfer
- Quiet rooms on each unit where patients can enjoy a book or quiet introspection in a comfy chair away from the activity of the unit.

We are committed to providing excellent care for our patients and being a valuable partner in our community.

For questions, contact clinical director Dr. Greg Nawalanic at gnawalanic@kumc.edu.
